OPAS ELK. MLZ. LTD. ŞTİ. 30 yıldır sektöre yeni bir soluk, müşteri memnuniyeti getirmenin gururunu yaşıyor. Paket şalter piyasasına yaptığı yeniliklerle adını duyuran OPAS, Türkiye’de önemli bir bayilik ağına sahiptir ve dünyanın 35 ülkesine de ihracatta kalite ve güvenini sunarak dünyanın elektriğine yön vermektedir.

Yaşanan ekonomik krize rağmen OPAS, yeni projelere ve teknolojilere her geçen gün yatırım yapmaya, istihdamı artırmaya devam etmektedir.

2010 yılı itibarı ile OPAS ürettiği paket şalterlere ek olarak polyester ve polikarbon panolar, izolatör ve aydınlatma grubu ile sektöre yeni bir soluk getirmeye, sizlere hizmet vermeye devam etmektedir.

OPAS, ISO(BUREAU VERITAS), CE ve TSE belgelerine sahiptir.

OPAS yerli sanayimiz içinde haklı gururumuzu sürdürmeye devam etmektedir.

*OPAS will continue to share the pride of passing the 30-year period with you by improving the customer satisfaction and bringing innovation to the sector. As you know, OPAS community was established on 3000 square meter space in Turkey as a hundred percent domestic production.*

*OPAS, which has introduced improvements to cam switch market, has a significant network of franchise in both Turkey and the world, whose products are being used in 35 countries in the world.*

*Contrary to the economical crisis in the world, OPAS continues to invest on new projects and develops a new product every passing day.*

*OPAS completed its investments and launched production of applications of polyester material which are polyester enclosures, isolators and lighting products and OPAS will continue to bring a new breath to the sector.*

*Newly developed polyester and polycarbon enclosures and their plexiglass versions have been introduced to our dear customers. Last but not least, our company and products have the following certifications: ISO 9001: 2008 ( BUREAU VERITAS ) , CE , TSE.*

## PAKET ŞALTERLER HAKKINDA GENEL BİLGİ

Paket şalterler sık açma-kapama gerektiren aşağıdaki ana ve yardımcı devrelerde kullanılır.

- 1- Bir, iki ve üç fazlı elektrik devrelerinin açma-kapamasında,
- 2- Gerilim-akım değerlerini ölçen cihazların kumandasında,
- 3- Motorların beslenme devrelerini açıp-kapayarak yol verme veya durdurma işlemlerinde,
- 4- Transformatör ve kaynak makinalarında açma-kapama, selektör ve kademe değiştirici olarak,
- 5- Kutup değiştirici veya gruplama şalteri olarak şebeke-regülatör gibi ihtiyaç olan yerlerde,
- 6- Otomatik geri dönüşlü startlı şalter olarak kullanılır.

Paket şalterlerimiz, en kaliteli izolasyon malzemesi ve gümüş alaşımli perçin çakılmış bakır kontak kullanılarak şalt cihazları alanında modern teknolojilerle istifade etmek suretiyle, en yüksek mühendislik standartlarına göre imal edilmektedir.

Seri üretilmekte olan temel yapı elemanları sayesinde şalterler, çok kısa zamanda monte edilip, her türlü açma-kapama gereksinimini yerine getirmektedir. Pano üzerine, içine, trafo merkezlerinin alçak gerilim tarafına, şalt panolarına, dağıtım kabinlerine monte edilebilir, madencilik, gemicilik ve benzeri sahalarda çeşitli ihtiyaçlara cevap verir.

Her şalter, şalt programına göre kolayca monte edilip sökülebilen çeşitli açma-kapama elemanlarından meydana gelmiştir. Açma-kapama elemanlarının gövdesi, kaçak akım ve ark etkilerine dirençli plastik malzemeden yapılmıştır. Her elemanı birbirinden 180 derece açı ile yerleştirilmiş tek açmalı iki kontak çifti vardır. Kontak çifti, iki sabit kontak ile hareketli kontak köprüsünden oluşur.

Kontak kapanması basınç yayı, açılması ise şalt elemanın merkezindeki bir kama (program diski) sayesinde olur. Bütün şalt elemanlarının birbirlerine sıkı bir şekilde bağlı olmasıyla kontakların hemen hemen aynı anda açılıp-kapanmaları sağlanır.

Çift kontak paralel açma ve elektrik arklarına dayanıklı bakır kontaklara özel gümüş alaşımli perçinler sayesinde yüksek akım kesme kapasitesi ve uzun ömür sağlamaktadır. Şalterin şalt açıları 30 derece, 45 derece, 60 derece ve 90 derece şeklindedir.

## GENERAL INFORMATION ABOUT CAM SWITCHES

*Cam Switches are used at the following main and auxiliary circuits requiring frequent switching on-off.*

- 1-In switching on-off of single, two and three-phase electric circuits,*
- 2-In controlling of devices measuring voltage-current values,*
- 3-In processes of starting or stopping by switching on or off the supply circuits of motors,*
- 4-As on-off switch, selector and step-alternator in transformers and welding machines,*
- 5-As pole-alternator or grouping switch, in required places such as network-regulator,*
- 6-As automatic, reversible switch with start.*

*Our Package switches are manufactured according to the highest engineering standards by benefiting from the modern technological developments in the range of switch devices by using the highest-quality isolation materials and silver compound riveted copper contact. Thanks to the basic structural elements produced in series, the switches are mounted in a very short time and perform the function of any kind of switching on-off. It can be mounted on the low voltage side of transformers on or in the board, on switchboards, at distribution panels and meets the various requirements of mining, navigation and etc as well.*

*Each switch consists of various on-off elements that can be easily assembled-disassembled according to the switching program. The casing of the switching on-off elements are made of plastic material resistant to electric leakage and arc effects. There are two pair of contacts with a single opening and each component is positioned to 180° to the other. Contact pairs consist of two fixed contacts and a movable contact bridge.*

*Contact closing is realized through pressure spring and opening through a wedge (program disc) at the center of the switch element. Due to the fact that all the switch elements are connected tightly to each other, the contacts are provided to open and close synchronously. High current breaking capacity and long life-span is provided through special silver compound rivets resistant to electric arcs and double-contact parallel opening. The switching angles of switches are as follows: 45°, 60° and 90°.*

**KAPALI TİP KÜÇÜK, ORTA VE BÜYÜK ŞALTERLER**

Kapalı tip şalterler genel kullanım olarak tasarlanmış olup, kumanda sistemlerinde, ölçü komutatörlerinde, kademeli, kutup değiştirici ve motor kumanda devrelerinde güvenle kullanılır. Hava ve yüzey atlama gerilim mesafeleri 690 volttan daha büyüktür.

Kontakt malzemeleri ve kablo bağlantı klemensleri EN 60947-3'e uygundur. Bütün klemens ve kontakt bağlantıları el temasına karşı korumalıdır. Bu ise VDE 0106. Bölümün 100. maddesi veya VBG4'e uygun olarak üretilmiştir.

Yıldız/Düz Tornavida ile çalışmalarda kontakt vidaları seri ve emniyet olarak sıkılabilir. Şalterlerin tasarımında azami yer tasarrufu, kolay montaj ön planda tutulmuş, kullanımda kolaylık ve zaman tasarrufu sağlayacak bir yapıdadır. Şalterlerin anahtarlama açıları 30-45-60-90 derecedir.

Hareketli kontakt elemanları bakır olup, gümüş içerikli perçinler kullanılır. Kontaktlar basarak açıp-kapama yaptığından emniyetle çalışırlar. Tahrik mili üzerinde bulunan kamlar, yani programlar diskleri kontaktların aynı zamanda açıp kapasını gerçekleştirdiğinden bütün kumanda devrelerinin veya fazlarının gecikmesiz aynı anda açıp kapasını temin eder.

Hammaddesi yanmaya dayanıklı ve alev almayan "PBT" plastiktir. Kapalı tip şalterler, EN 60947-3, IEC 947-3 ve diğer arası normlara ve çevre şartlarının özellikleri dikkate alınarak AR-GE çalışmaları yapılmıştır. AB ve bazı dünya devletlerinin kabul ettiği CE normlarına ve kriterlerine uyumlu hale getirilmiştir. Kontakt ve köprüler tamamen kapatılarak elektriğin el ile teması kesilmiştir.

Kullanım şartları ve isteğe bağlı olarak kilitli asma kilit kullanılır. Dünya standardı normlarına göre paket şalterlerimiz; Ana şalter, yüksek kesici şalterler ve kesici şalterler olarak üç şekilde kullanılabilirler. Yükteki kesici şalterler en az AC23A. Kullanım şartlarına dayanıklı olmalıdır. Kesici şalterler ise yük devresini kontaktör üzerinden kapatmayı temin eden yardımcı kontakt bulunacak şekilde olmalıdır. Kesici şalterlerin seçiminde sürekli çalışma akımı dikkate alınmalıdır. Şalterlerin seçimini yaparken teknik değerler bölümünü dikkatli incelemek gerekir.

**CLOSED TYPE SMALL, MEDIUM AND LARGE SIZE SWITCHES**

*Close type switch has been designed for general use in control systems. User safety, less space and easy mounting are the primary advantages of this special design. Padlock can be used on locked type as in our other types of switches.*

*Closed type switch has been developed according to the standards of EN6097-3, IEC and CE which meets the world standards about quality and ecology. Contacts and terminals are concealed to prevent electric shocks caused by touch. The body material is PBT which can resist and is non-flammable up to very high temperatures. Contact materials and terminals fully comply with EN 60947-3.*

*Moveable contact elements are of copper and silver riveted compound which enables high conducting. Control circuits operate without delay due to program discs, cams and contacts in the switch moving synchronously. The switching angles are 45°, 60°, 90°.*

*The user must pay attention to the technical specifications before defining type and capacity of the cam switch to be used on the control panel or machine.*

## KAPALI TİP MİNİK BOY ŞALTERLER

### CLOSED TYPE MINI SIZE SWITCHES

Yeni teknoloji ve uluslararası standartlara göre geliştirilmiş olan MİNİ tip paket şalterlerimiz kumanda devrelerinde güvenle kullanılabilir.

Bu şalterler minimum ölçülerde tasarlanmış olup dokunmaya karşı tam korumalıdır.

Modern tasarımlı paket şalterlerimiz hızlı kablo montajına olanak sağlayan vida bağlantı sistemine sahiptir.

Az montaj yeri gerektiren MİNİ tip şalterlerimiz standart olarak 35x35 mm ön plakalı, 4 delik montajlı olarak 6A, 8A ve 10A olarak üretilmektedir.

### SQUARE TYPE MINI SIZE SWITCHES

Mini square type of cam switches has been developed regarding to international standards that safe using in control circuit.

Mini type of switches has designed by minimum dimensions for finger protection.

Our modern design of cam switches have easy screw connection system for fast cable mounting.

Mini type of switches have standard front frame 35x35mm, 4 assembly holes that need less space for montage and manufactured in 6A and 10A

- Dokunmaya karşı tam koruma
- Hızlı ve kolay montaj
- Minimum ölçü
- Modern tasarım
- Yeni teknoloji
- Isıya dayanıklı termoplastik gövde
- Yüksek kontak teması

- Protection against touching
- Easy and quick assembling
- Minimum size
- Modern design
- New technology
- Heat-resistant thermoplastic body
- High contact conductivity

## YUVARLAK TİP ŞALTERLER

### ROUND TYPE CAM SWITCHES

#### Şalterlerin Doğru Seçimi :

Yükte kesici şalterler, en az AC-23A kullanım şartlarına dayanıklı olmalıdır. Kesici şalterlerin seçiminde sürekli çalışma akımı dikkate alınır. Ana şalter olarak kullanıldığında, makina üzerindeki en büyük motorun tam frenlenmiş konumda çekeceği akım ile diğer tüm sarf birimlerinin toplam akım değerlerine eşit olmalıdır. Ayrıca, tüm sarf birimlerinin nominal çalışma akım değeri toplamı, şalterin sürekli çalışma akım değeri üzerine çıkmamalıdır. Teknik değerler kısmı iyi incelenmelidir.

These package switches with the design registration held by OPAŞ have superior characteristics: body heat-resistant up to 1200°C, switch components positioned at 120° to each other, control of 3 phases in a block and 3 moving contacts with a single opening moving contacts bridge the fixed one and contain copper bars, 2 and 3 mm in width. Special silver rivets mounted on moving contacts provide a long life, and high capacity to break currents, and prevent excessive arcing. Package switches have high capacity to break currents and adequate mechanical and electrical strength. They can accept short overcharges and, when used with a fuse, feature high resistance to peak short-circuits.

#### Selecting the right switches

Charge breaking switches must be at least AC-23A and have adequate strength against conditions of use. In selecting breaking switches the continuous operating current will be considered. If used as the main switch, it must be rated up to the current to be consumed by the fully braked largest engine of the machine, plus the current to be consumed by all the other components. In addition, the nominal operating current of all the current-consuming components should not exceed the continuous operating current of the switch. Technical values should be checked carefully.

## BÜYÜK KARE TİP ŞALTERLER / LARGE SQUARE TYPE

## NORMAL ve KAPALI PAKET ŞALTERLERDE ÖN PANEL TİPLERİ

Normal ve kapalı paket şalterlerimizin ön paneli 4 tipte tasarlanmıştır.

## 1 - Standart Tip

Siyah çerçeve, beyaz veya gri ekran fonundan oluşmaktadır.

## 2 - Kilitli Tip ( Kilitli Mekanizma)

Ana şalter veya emniyet şalteri üzerinde kullanılmak üzere, şalter kapalı konumdayken 1-2 asma kilit takılabilir.

Renk Kombinasyonu;

Çerçeve : Sarı ( İsteğe bağlı olarak siyah, kırmızı yapılabilir.)

Mandal : Kırmızı ( İsteğe bağlı olarak sarı, siyah olabilir. )

## 3 - Geniş Çerçeveli

Genel olarak makinelerin üzerine, 4 köşesinden monte edilerek, fiziksel olarak güzel görünüm vermektedir.

## 4 - Etiketli Çerçeve

Siyah çerçeve, beyaz veya gri ekran fonundan oluşmaktadır. Etiketli kısım standarttır.

## FRAME TYPES FOR STANDARD AND CLOSED TYPE SWITCHES

The front panel of standard cam switches is designed in 4 types:

## 1 - Standard Type

Consists of black frame, white or grey label.

## 2 - With Padlock (Locked Mechanism)

1-2 padlocks may be mounted on the switch as closed, in order to be used as the main switch or safety switch.

Color combination;

Frame: Yellow (may be black, red as optional.)

Latch: Red(may be yellow, black as optional.)

## 3 - Mounting Frame

Generally mounted to 4 corners of the machines and gains physically a nice view

## 4 - Labelled Frame

Consists of black frame, white or grey label. Labelled part is standard.

## IP 65 POLYESTER PANO ÖZELLİKLERİ / IP 65 POLYESTER ENCLOSURE'S QUALIFICATIONS

Yalıtıcıdır; elektriği iletmez. Oluşabilecek elektrik arkını 2 dakika gibi sürede sızdırmaz. Cam elyaf katkılıdır; Oluşan ark vb.den dolayı yangınlara karşı müdahale imkanı sağlar. Çabuk alev almaz. Su ve nem geçirmez; Dış atmosferik koşullara -50°C / +200°C dayanıklıdır. Paslanmazlık ve korozyonlara dayanıklılık; Boya ve bakım maliyeti yoktur. Darbelere ve asitlere karşı dayanıklıdır. UHT katkılıdır; Ateşe ve güneşten gelen UV ışınlarına karşı dayanıklıdır. HALOJEN FREE'dir. Antibakteriyeldir; Mikro organizma üretmez (su ve sabunla kolay temizlenir). Modülerdir; Kolayca işlenebilir montaj kitiyle kolay montajlanır. IP 65/67; sert hava koşullarına ve ortamda olan toz ile benzer etkilerden etkilenmez ve iç yapıyı korur.

*Isolated; Does not conduct electricity. Isolates possible electric arcs for 2 minutes. Fiberglass doped; Provides opportunity to act against possible deflagrations and resists fire. Water and humidity resistant; Resistant to environmental conditions of -50°C to 200°C. Oxidation and corrosion resistant; No paint or maintenance costs. Resistant to impacts and acid. UHT resistant; Resistant to fire and UV lights from the sun. It is halogen-free. Antibacterial; Does not harbor micro-organisms. Easily cleaned with soap and water. Modular; Ease of installation with the easy-to-use assembly kit. IP 65/67; Resistant to extreme environmental conditions and unaffected by impurities like particles in the air, thus the inner structure is protected.*

## IP 65 POLİKARBON / ABS PANO ÖZELLİKLERİ / IP 65 POLYCARBONATE / ABS ENCLOSURE'S QUALIFICATIONS

ABS reçineleri akrilonitril, butadien ve stiren den elde edilen kopolimer lerdir.AKRİLONİTRİL ; kimyasal olarak sağlamlık, STİREN; kolay işlenebilirlik, sertlik ve parlaklık sağlar.BUTADİEN ;ise soğuk hava şartlarında ve oda sıcaklığında darbelere dayanımı ve dayanıklılık sağlayıcı olarak rol oynar.

Polikarbonatlar, termoplastiklerin özel bir grubudur. Işık geçirgenliği cama çok yakındır, ışık iletimi ; ışığın homojen olarak dağılması en önemli özelliğidir. Aynı zamanda ısıya, kimyasal maddelere, çizilmeye, darbeye dayanıklılığı yüksek, gıdaya uygun, hafiflik , UV koruması, ateşe karşı dayanıklılık, alev yaymazlık özelliği, ses ve ısı yalıtımı olan şeffaf plastikler diyebiliriz.

*ABS resins are copolymer that is made of acrylonitrile, butadiene and styrene. Acrylonitrile; provides chemical integrity, Styrene; provides processability, solidity and gloss. Butadiene; provides impact resistance and durability in extreme environmental conditions.*

*Polycarbonates are a special group of thermoplastics. Their transparency is close to glass's. Transparency; homogen dispersal of the light is the most important specification. Also they can be described as transparent plastics with resistance to heat, chemicals, scratching an impact, suitability to food, lightness, UV protection, fire resistance, resistance to spreading flames, noise and heat isolation.*

Polikarbonat kullanım sıcaklık aralığı : -100° C den + 135° C ye  
Polikarbonat ın erime sıcaklığı : 270°C / 380° C civarı  
Polikarbonatın kırılma endeksi : 1.585 ±0.001  
Polikarbonatın ışık geçirme endeksi: 90 % ± 1 %  
OPAŞ ABS Panoları bu özellikleri taşımaktadır.

*Polycarbonate usage temperature range: -100°C to 135°C  
Polycarbonate melting temperature:~270 - 380°C  
Polycarbonate fracture index:1,585 ± 0,001  
Polycarbonate transparency index:90% ± 1%  
OPAŞ ABS enclosures carry these qualifications.*

İki çeşit ürünümüz vardır.

1- opak 2-polikarbon

Opak denilen ürün cam kapaksız olup tamamı ABS den üretilmiştir. Polikarbon ise ; şeffaf kapağın polikarbon imal edilmesinden dolayıdır.Yani gövde ABS, şeffaf kapak polikarbonur.

*We have two kind of products*

*1-opaque 2-polycarbonate*

*Opaque products are without glass cover, manufactured by ABS completely. Transparent cover manufactured by polycarbonate. Casing is ABS, glass cover is polycarbonate.*

## İZOLATÖRLERİN ÖZELLİKLERİ / INSULATORS' QUALIFICATIONS

Gri PBT malzemeden yapılır. Vida ve somun kısımları nikel kaplamadır. 0-5000 V atlama testinden başarıyla geçmiştir. PBT malzemenin özelliğinden dolayı 400C'ye kadar dayanıklıdır. Metrik 5-6-8 olarak üretilir.

*Insulators made with gray PBT material. Screws and bolts are nickel-coated. tested and proved to be dielectric up to 5000V because of the PBT material, insulators are resistant up to 400C. Insulators are produced in metric 5-6-8 sizes.*

### KORUMA SINIFLARININ AÇIK OKUNUŞU

İlk hane kutunun katı yabancı maddelerin tehlikeli parçalara erişimine karşı sağladığı korumayı belirtir.  
*The first digit indicates the level of protection that the enclosure provides against access to hazardous parts (e.g., electrical conductors, moving parts) and the ingress of solid foreign objects.*

IP	Testler	Tests
0	Korumasız	No protection
1	Vücutun herhangi geniş bir bölgesi, elin tersi gibi, fakat kasti olarak temasa karşı koruma sağlamaz	Any large surface of the body, such as the back of a hand, but no protection against deliberate contact with a body part
2	Parmak veya benzer objeler	Fingers or similar objects
3	Aletler, kalın kablolar vb.	Tools, thick wires, etc.
4	Çoğu kablo, vida vb.	Most wires, screws, etc.
5	Tozun girişi tamamiyle engelenememekte fakat ekipmanın çalışmasına engel olacak kadar girişi engellemekte, Temasa karşı tam koruma	Ingress of dust is not entirely prevented, but it must not enter in sufficient quantity to interfere with the satisfactory operation of the equipment; complete protection against contact
6	Toz girişi yok; Temasa karşı tam koruma	No ingress of dust; complete protection against contact

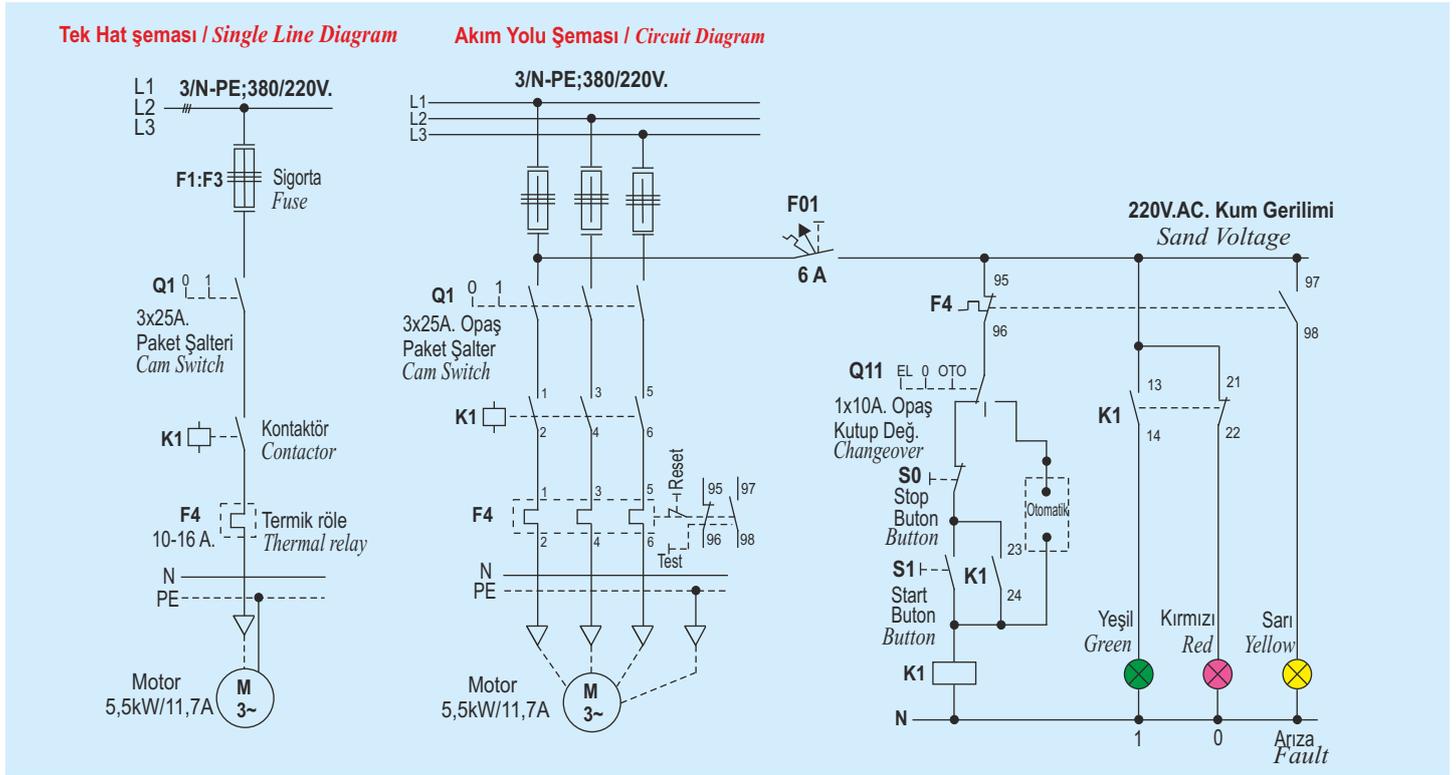

### PROTECTION DEGREE

Zararlı su girişine karşı kutu içindeki ekipmanın korunması  
*Protection of the equipment inside the enclosure against harmful ingress of water.*

IP	Testler	Tests
0	Korumasız	No protection
1	Damlayan suların (dik olarak düşen) hiç bir zararı yoktur.	Dripping water (vertically falling drops) shall have no harmful effect.
2	Kutu normal pozisyonundan 15 dereceye kadar döndürülse bile damlayan suların hiç bir zararı yoktur.	Vertically dripping water shall have no harmful effect when the enclosure is tilted at an angle up to 15° from its normal position.
3	Dikeyden 60 dereceye kadar püskürtme şeklinde düşen suların hiç bir zararı yoktur.	Water falling as a spray at any angle up to 60° from the vertical shall have no harmful effect.
4	Herhangi bir yönden gelen serpmeye suların hiç bir zararı yoktur.	Water splashing against the enclosure from any direction shall have no harmful effect.
5	Herhangi bir yönden kutuya karşı bir ağızdan doğrultulan suların hiç bir zararı yoktur.	Water projected by a nozzle against enclosure from any direction shall have no harmful effects.
6	Herhangi bir yönden kutuya karşı güçlü fışkırtılan suların hiç bir zararı yoktur.	Water projected in powerful jets against the enclosure from any direction shall have no harmful effects.
7	Belirtilen zaman ve basınç koşullarında kutu suyun içine daldırıldığında zararlı olacak seviyedeki suyun içeri girmesi mümkün değildir.	Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time (up to 1 m of submersion).
8	Üretici tarafından belirtilen koşullar altında ekipman suyun altında devamlı kalmaya uygundur.	The equipment is suitable for continuous immersion in water under conditions which shall be specified by the manufacturer.

Rail Clip Apparatus

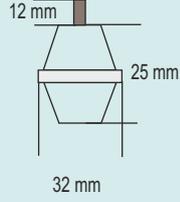

Tabandan şalterin tabanına vida takılmak suretiyle montaj edilir. Ordan da ray klemensine takılabilir.

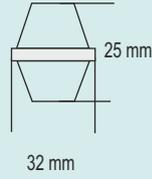

The rail clip is assembled to the base of the switch with a screw and so, the switch can be assembled to the rail.
